Google Maps Project

jan.schulz@devugees.org

Task 1

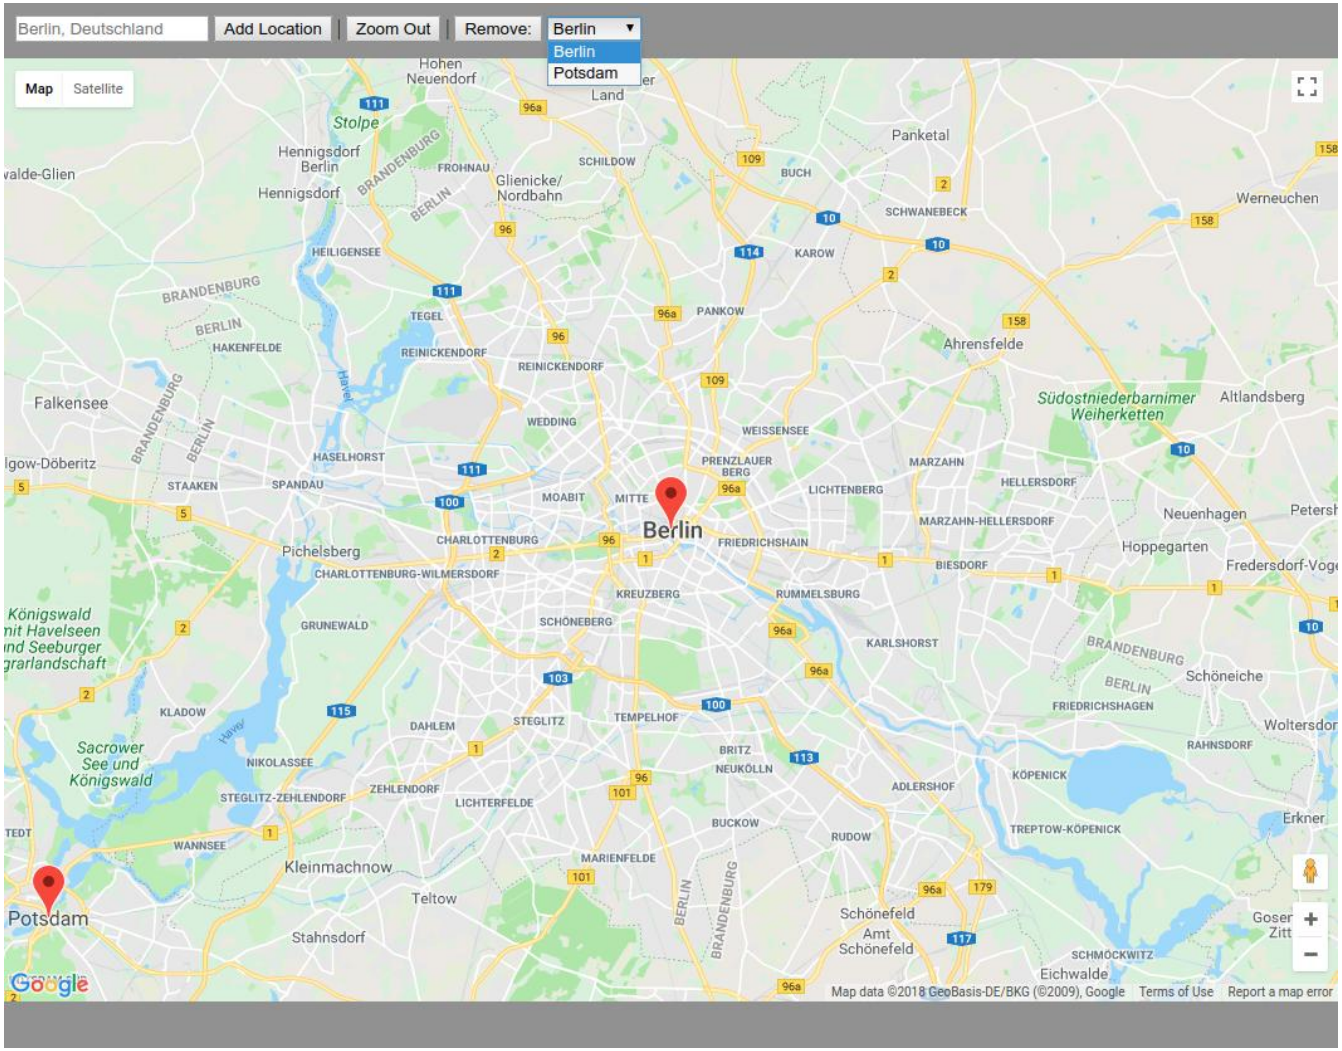
1 – Pull the latest devugees8 repository

2 – Get an API Key from https://cloud.google.com

3 – Go to jquery/gmproject

4 – Analyze gm_1 – gm_3.html – Try to understand it based on the comments and my explanations. Insert your API Key to test it.

5 – Create the following layout in index.html (next slide)



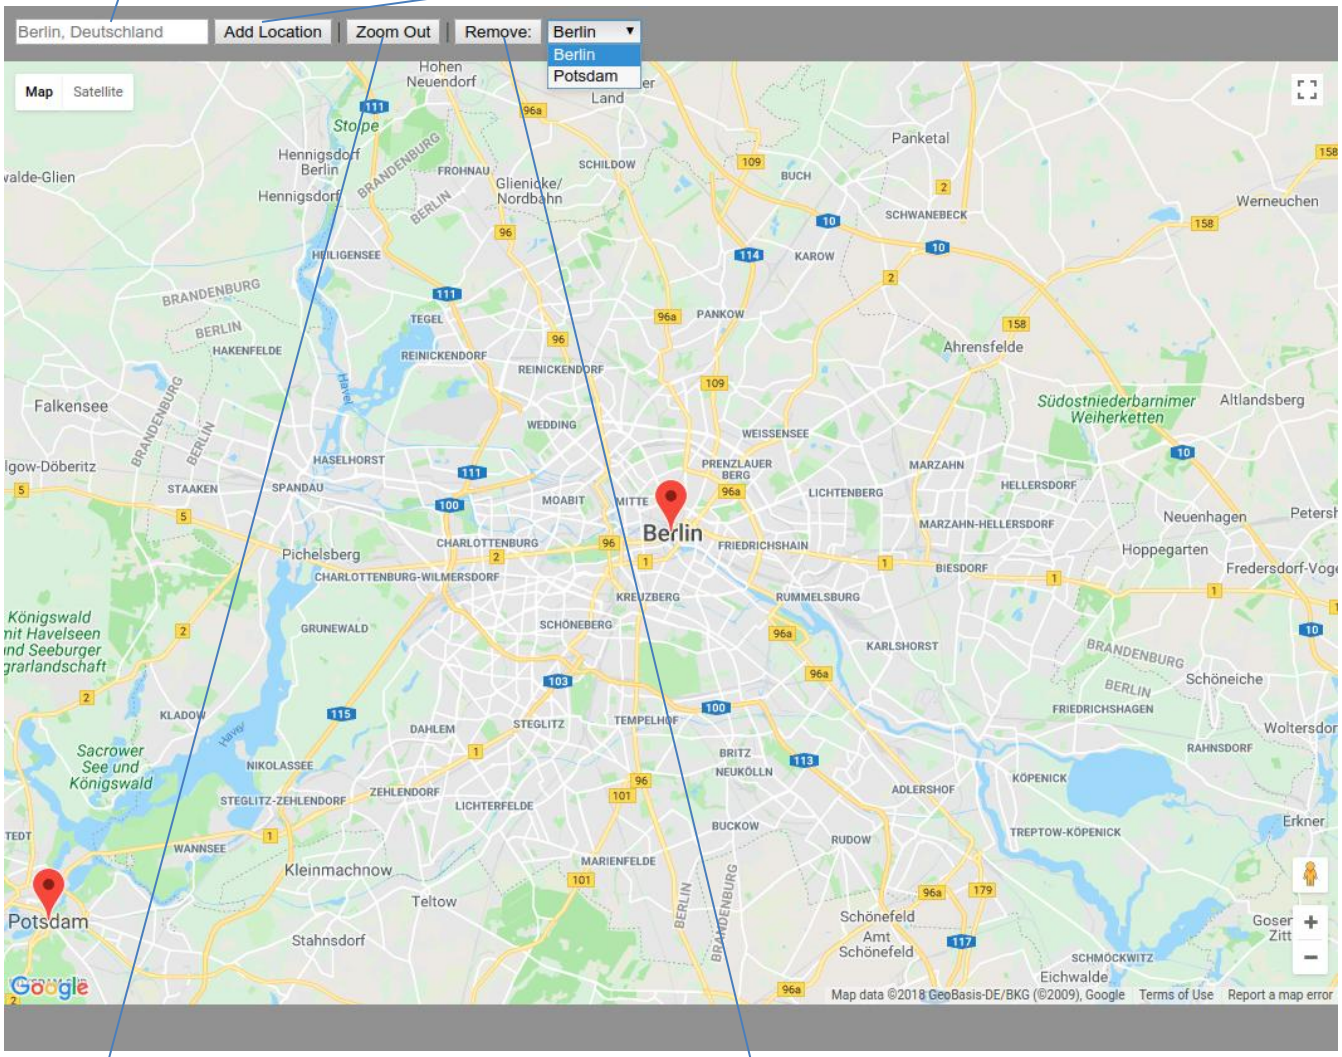
Berlin, Deutschland
Add Location
Zoom Out
Remove:
Berlin
Berlin
Potsdam
Map
Satellite
Berlin
Potsdam
Map data ©2018 GeoBasis-DE/BKG (©2009), Google
Terms of Use
Report a map error

Task 2

6 – Add the following features using Jquery. Before you start, think how you can organize your marker points.

The user can enter a geo code here

Adds the geo code as new marker to the map



Zooms out to zoom level 3

Removes the selected location
